## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of invention I in Paper No. 8 is acknowledged.
2. Claims 12 and 13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

### *Drawings*

3. The drawings are objected to under 37 CFR 1.83(b) because they are incomplete. 37 CFR 1.83(b) reads as follows:

When the invention consists of an improvement on an old machine the drawing must when possible exhibit, in one or more views, the improved portion itself, disconnected from the old structure, and also in another view, so much only of the old structure as will suffice to show the connection of the invention therewith.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Figures 1 and 2 appear to be representations of the various working parts of the applicant's invention. From these figures, it is not clear to the examiner the exact layout of the folding and tucking jaws, spider mechanisms and the proper operation of the adjusting mechanism.

Figures 3 and 4 appear to be gearing schematics, which the specification relies heavily on to explain the applicant's invention and to which the examiner is not able to interpret the adjusting mechanism and parts that are pertinent the applicants invention.

### ***Claim Objections***

4. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 6-12 have been renumbered 7-13.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claim 1-7,12 and 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification and the drawings do not adequately show how the collect cylinder and the jaw cylinder function in relation to each other, the operation of the jaws on the jaw cylinder, the setting of the independently movable jaw, the mounting and supporting of the jaws on the spider and the operation of the adjusting center or gear.

### ***Conclusion***

7. In view of the degree of clarity and understanding of the invention as disclosed in the applicant's disclosure, the scope of the claims cannot be ascertained. Therefore, a determination of the allowability of the claimed subject matter cannot be made at this time.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Michalik, Calbrix et al, Mayr, Eckert, Shibuya et al, and Kostiza have been cited to show devices that the examiner believes may be similar to the claimed invention
